

# *Vision 21*

## *Program Review Meeting*

U.S. Department of Energy  
National Energy Technology Laboratory  
Morgantown, West Virginia

November 6-7, 2001

The U.S. Department of Energy's Office of Fossil Energy has begun a program for developing 21st century energy plants that will have virtually no environmental impact. This program—***Vision 21***—has the overall goal to effectively eliminate, at competitive costs, environmental concerns associated with the use of fossil fuels for producing electricity and transportation fuels.

On September 30, 1999, a program solicitation entitled “Development of Technologies and Analytical Capabilities for Vision 21 Energy Plants,” with multiple closing dates was issued. Projects have been selected for the first three rounds.

The purpose of the ***Vision 21 Program Review Meeting*** is to give contractors an opportunity to report on the progress of their projects and to exchange information. A tentative agenda and detailed registration information will be mailed to you at a later date.

For more information on the ***Vision 21 Program***, please visit the NETL Homepage at [www.netl.doe.gov/technologies/vision21](http://www.netl.doe.gov/technologies/vision21). For continuing information on the ***Vision 21 Program Review Meeting***, visit the NETL Homepage at [www.netl.doe.gov/events](http://www.netl.doe.gov/events) or contact NETL Event Management at 304-285-4750/1-800-553-7681/[confserv@netl.doe.gov](mailto:confserv@netl.doe.gov).

If you are interested in attending this meeting and are not a U.S. citizen, please contact NETL Event Management as soon as possible for additional information on requesting a DOE unclassified visit.
